Asia's Only Trade Show on
Passive Fire Protection Systems

10-12 September 2026

Yashobhoomi (IICC), Dwarka,
New Delhi

Plan . Prevent . Protect

The Event

Fire Safe Build India (FSBI) is a dedicated industry event focused exclusively on passive fire protection systems for the built environment. The platform was conceived to address the need for structured engagement on fire safety by bringing together the stakeholders involved in design, specification, construction, testing, certification, and regulation of passive fire protection.

Over successive editions, Fire Safe Build India has established itself as a focused forum for industry interaction, enabling informed discussion on the role of passive fire protection in contemporary construction and infrastructure projects.

Technologies & Systems In Focus

Fire Safe Build India presents a comprehensive spectrum of passive fire protection technologies and systems applicable to buildings and infrastructure.

Innovative Solutions & the Latest Products on Display in Preventive Fire Protection.

Structural Fire Protection: Fire protection for structural steel and concrete frameworks, fire-retardant coatings.

Fire-Resisting Products: Fire-resisting walls, floors, and ceilings, fire-resistant glazing, façades, partitions, panels, curtain walls, cladding, fire/smoke curtains, fire-resisting doors and shutters, fire-rated hardware (hinges, locks, closers, etc.).

Penetration Sealing & Building Envelope Integrity: Fire-stopping systems, penetration seals (pipes, cables, conduits), cavity barriers, fire-rated ductwork and dampers, fire-rated building envelope components.

Electrical Installations: Fire-rated cables; cable ducts, cable support and routing systems, cable bandages, fire protection cabinets.

Ventilation & Smoke Extraction: Fire dampers, ventilation ducts, heat extraction systems, smoke exhaust systems.

Building Automation & Integrated Safety Systems

Conference & Technical Programme

A defining element of Fire Safe Build India is its structured conference and knowledge programme. Curated sessions, panel discussions, and expert presentations address priority issues influencing passive fire protection practices, including regulatory frameworks, design coordination, installation and inspection processes, testing methodologies, traceability requirements, and the role of digital tools

Santosh Warick
MIDC Fire Service

Mr. P. Ramakrishnan
DLF Ltd

Dr. DK Shami
Fire Engineering at DLF

Vinod Kapse
Kapse Consulting Engineers Pvt. Ltd

Ar. Anuja Sawant

Ray Kerry
Coopers Fire Ltd

Ar. Alhad Gore
Beyond Design Architects

Hemant Khadse
East Crop Group

Jothi Ramalingam
Aadit Fire Testing Laboratory

Abasaheb Kale
pdkASM Consulting

Boris Schubert
Celsion Fire Protection Systems GmbH

Audience & Industry Participation

Fire Safe Build India engages a specialised professional audience drawn from across the fire safety and construction ecosystem. Participants include architects, consultants, developers, builders, fire safety professionals, manufacturers, system installers, testing agencies, institutions, and representatives from regulatory and policy bodies.

Industry Voices

Fire Safe Build India provides an excellent platform for stakeholders to explore diverse, informative passive fire protection products and vital conference discussions. Key international recommendations from the conference will significantly improve our fire safety codes and standards

Santosh Warick - Maharashtra Fire Service

Passive fire protection is the silent guardian of escape routes and critical infrastructure, and this exhibition- FSBI highlights how strongly the fire-protection community in India is connected in pursuing these shared goals

Boris Schubert Celsion Brandschutzsysteme GmbH

Passive Fire is the first line of fire defence in protecting life, we well design passive protection will offer best returns while active protection are always supplementary

Vinod Kapse - Kapse Consulting Engineers Pvt.

PROMINENT BRANDS AT FSBI
